Description

Aquarian SKIII22 22''Super Kick III Texture Coated White Bass Drum Head

Internally Muffled, Reinforced Single-ply Head

Aquarian's latest SuperKick head, the SuperKick III, could be the sweetest so far. It combines a single ply of 10mil coated film with an internal damping ring and a Power Dot center to whisk away problem frequencies and reinforce the impact zone. What you're left with is a defined punch, a full low end, and a controlled snap that's ready for mixing and suited for the heaviest players. In fact, so effective is the SuperKick III's damping system that many users claim they don't need additional muffling. So pull out the pillow and fall in love with the tone of your bass drum all over again. Safe-T-Loc hoop design for tuning stability and a Sound Curve collar for a pure tone and wrinkle-free tension — even when tuned low.
